Professional Summary

Full-stack software engineering student with hands-on experience developing real-world applications. Skilled in frontend and backend development, software architecture, and Agile teamwork. Passionate about building scalable, user-focused solutions and eager to grow in dynamic engineering teams.

Experience

UltraZound Labs

Developer

10/2024 – 06/2025 | Zaragoza, Spain

- Developed a web-based echography simulator (frontend in NuxtJS, backend in Node.js).
- Designed and implemented server-side architecture with authentication and REST APIs.
- Created responsive, interactive ultrasound simulations for physiotherapy training.
- Collaborated in a multidisciplinary team using Agile methodologies.

Conferences

International Conference Simulation - OneHealth

Madrid

Co-author of research proposing an echography simulator.

Education

Erasmus Exchange Program

West University of Timișoara

2024 – 2025 | Timișoara, Romania

- Completed final year abroad, strengthening **teamwork** and **international collaboration skills**.
- Studied masters courses in software engineering while working on thesis project.

Bachelor's Degree in Software Engineering

University of Zaragoza

2021 – 2025 | Zaragoza, Spain

- Thesis: Web echography simulator for physiotherapy tuition.
- Focus on full-stack web development, software architecture, and Agile practices.
